## 1 Introduction

The Latex doc will have many random stuff on it, there is no particular content or theme on the document. I will write whatever I would like to write based on my mood. The main objective of the document is to help me to learn some Latex. Latex is a program language used for typesetting technical documents. Latex is free program package created in 1985 by the American computer scientist Leslis Lamport as an addition to the Tex typesetting system. Latex is created to make it easier to product general-purpose books and articles within Tex
